

J. Newell Maddock, city building maintenance foreman, tests the new telephone system for the Santa Cruz Civic auditorium. It is being installed to help coordinate stage productions with lighting booths and other parts of the building. The phones are only one feature of the major overhaul of the auditorium, including new stage floor and curtains, better lighting and sound system and improved heating. Workmen on scaffolding are painting the auditorium walls. The work is part of a five-year program of improvements.

HOLTON APPOINTED
