County Bank's Data Processing Center

11-23-66

This is an architect's sketch of the data processing center to be constructed by County Bank of Santa Cruz in the San Lorenzo Industrial Park, at the southeast corner of Encinal and DuBois streets. R. J. Seller, bank president, announced the contract for construction was awarded to the F. B. Stearns Construction company, Soquel. Architect is Melvin A. Rojko, A.I.A., of San Mateo. In addition to internal func-

tions, Seller said the center will handle industrial payroll processing, research analysis, and the bookkeeping and billing in accounts receivable, among other things. The center will be located on a one-acre parcel of land, with 10,000 square feet of floor space, or about 23 per cent of the total site. More than twice as much parking as required will be provided, he said. The building is scheduled for completion by March 1, 1967.
