

Scotts Valley Overpass Bridge

1-19-61

Paving work is under way on the approaches of the so-called Scotts Valley overpass at the southerly end of the final Los

Gatos freeway link. The overpass bridge is nearing completion and may be put into use while the main highway is con-

structed, according to R. N. Keller, state resident engineer. Ultimately, the overpass access to Camp Evers will provide for

northbound traffic. The three-mile highway 17 freeway link is due for completion in mid-summer.
