Ansel Adams Speaks At UCSC Affiliates Dinner

Bearded photographer-naturalist Ansel Adams converses with UC regent Donald Mc-Laughlin in an interlude be-fore last night's charter day dinner of the University of California at Santa Cruz.

Standing are (from left) Regent Theodore Meyer, McLaughlin, UCSC Affiliates
President Forrest Murdock,
and UCSC chancellor Dean
McHenry. Seated beside Adams is Regent Mrs. Edward Heller. Adams was speaker at the dinner, sponsored by the Affiliates, marking the 97th anniversary of the University of California and the third annual dinner for UCSC.

Photographer Says UCSC Site Can Be **Beautiful In A New, Vital Tradition**

By Alan Jones Sentinel Staff Writer

In a time of "common dese-cration of the earth," the Santa Cruz university campus offers the opportunity to demonstrate the "appropriate relationship of his environment," phoman to tographer and conservationist Ansel Adams said last night. "It is unthinkable that this ex-

traordinary prospect will not

New Planner

planning commissioner, his seat on the commission today. Fox, 52, is owner of Fox Rents and Sells, Santa Telephone Answering Cruz and Radio Service, and a coowner of Santa Cruz Ambulance Service. He was nomi-nated by Seaside Supervisor Russ McCallie and replaces four-year commission veteran Erle Byer, who moved from the Seaside district.

be fully realized," Adams said.

The UCSC campus can and will be "one of the most beautiful and effective campuses any-where in the world," Adams predicted. "We are not striving for the medieval solemnity of Oxford and Cambridge, the ur-ban intensities of the Universities of London and Paris, or the deeply colonial and traditional aspects of Harvard, Yale and Princeton. We do have, however, the opportunity to establish a new and vital tradition."

But, Adams warned, "there will be constant pressures for the dilution or breakdown of our intended pattern. Some say 'It will be too costly.' . . . or 'It may not have true academic character.'"

The objections already have been answered, he said. The cost will be low in relation to what will be created, the campus's spaciousness is of great advantage, and "this is the great opportunity to create a new and vital academic character," he Adams spoke at the third an-

nual charter dinner of the UCSC Affiliates. He was commissioned when the Santa Cruz campus was chosen to produce a folio of photographs of the site—the old Cowell ranch-in its former state.

The campus, while not a true

wilderness, after a century of use, still "has the great charm of rural integrity, western style," Adams said, a quality that should be preserved in the university structures to be built.

There may be a temptation to "seize upon this precious acreage and trim it to our conventional ideas of managed arboreal beauty," he warned. "But it will be easier and wiser to relate this project to the quiet splendors of the environment. The university, as it grows,

will relate more and more to the entire area, from Santa Cruz to Big Sur, Adams said.
In addition to its basic pro-

gram, Adams suggested new programs appropriate to the university. He proposed an institute of fine typography, a center of creative photography, a musical festival program combined with composer-in-residence pro gram, an appropriate art center designed by "the finest architectural talent," and a school

of conservation. A school of conservation would tie in with curricula of

planning, architecture, and sci-

ences "extending knowledge of the land, the ocean, and the air around us."

Chancellor

praised

Dean McHenry and his staff for their efforts to retain the campus's natural appearance and preserve its ranch atmosphere.

He conceded that relatively few "comprehend the vast importance of the natural scene, and the greater importance of man making proper adjust ment to it." But those who do, he said, "are usually more realistic and compassionate realistic citizens than those whose na-tures mirror only the bleak concrete deserts of the con-temporary urban scene."

Quoting Robinson Jeffers, he

said, "it is time to kiss earth again."

The more than 400 guests heard a report on the university's year's progress by James Hammond, and were entertained by the senior men's octet from Berkeley campus.

the Berkeley campus.

The Affiliates elected a new slate of three-year directors, naming Judge Harry Brauer, Dr. James Harring Marty Franich James Hammond, Roy McCallum, Mrs. K. C. Shaffer, Mrs. Corenne Smith, Dr. Marvin Stark, and Mrs. Gladys Wishard.

New officers for the board of directors, also chosen last night, are Forrest Murdock, re-elected president; Hammond, vice president; Wishard, secretary; Otto Larsen, treasurer.

To Speak

effects on man will be dis-cussed by Noel D. Bryan-Jones of the Christian Science board of lectureship tomorrow at 8 p.m. at the First Church of Christ, Scientists, 612 Ocean street. His lecture is titled "God Omnipotent Makes Triumphant." Bryan-Man Jones is from Worthing, Sussex, England, and was former-ly a council member of the British Optical association. For the past few years he has been devoting full time to Christian Science practice.

and he castel and wiser to relate this project to the quiet splendors of the environment." The university, as it grows,

will relate more and more to the entire area, from Santa Cruz to Big Sur, Adams said.
