

New fire engine

Sign painter Clarence Dillwood letters the door panel on Aptos Fire Department's new \$120,000 fire engine as Fire District director Walter Jordan, County Supervisor Robley Levy, and Fire Chief Nick Baumgartner watch. The truck, manufactured

by the Seagrave Co. of Clintonville, Wisc., can pump 1,500 gallons a minute of water and carry 500 gallons in a storage tank. It will be assigned to the fire station on Soquel Drive after firemen finish equipping it in about one month
