\$1.3 Million Revenue Bond Issue Urged By Commission

Santa Cruz City Water commission yesterday recommended that a \$1.3 million revenue bond issue be placed before city voters April 9. It would be for improvements and additions to the present system.

The commission, stung by the memory of a \$800,000 under estimation in bonds for development of Newell Creek dam, recommended a liberal initial authorization.

"We don't have to issue all the bonds," Water Director Weston Webber agreed. The commission approved the following omnibus program to be financed by the issue:

1. Additional facilities to accommodate the University of California area and its environs, \$530,000.
2. Replacement and renovation of worn-out equipment, \$175,000.
3. Addition of new facilities to accommodate normal future growth, \$360,400.

4. Recreational facilities for Newell Creek reservoir, to be financed largely by a state grant, \$50,000.

5. Legal, investment, printing, election, reserves, and other costs, \$81,000.

Acting Chairman Ray Seller said excess funds would well be invested in a land acquisition program. "Land will never cost less than it does now."

Future population growth of this area may require construction of another reservoir by 1970, it has been predicted by consultants.

Webber emphasized that these costs will not be borne by the taxpayers. Bonds will be retired with revenue from water sales.

A meeting next week has been tentatively scheduled with representatives of the largest new "customer," the University of California, to discuss future water requirements of the campus.

Moratorium Being Asked For Mid-County Sewers

The executive officer of the Central Coast Regional Water Control board has asked the board of supervisors to place a moratorium on connections to the Capitola and East Cliff sanitation systems.

This would halt construction in the areas—or at least prohibit inhabitation of new structures—Ray Abich, Capitola Sanitation district secretary, said today.

Executive Officer Raymond Walsh, in a letter to the county, states the moratorium should be enforced until a February bond election. Further

cause operations are not meeting standards.

If the bond issue fails, Walsh asks that the moratorium be continued until the control board can act. He says the control board has indicated an intention to prevent connections.

Failure to control future connections would cause treated, and sometimes raw, sewage to be spilled into the ocean waters at Capitola and nearby beaches.

Truman Reported

Preserve Beauty Of Site, Regents Tell Architects

Approval of the preliminary long range development plan for the Santa Cruz campus was granted by a unanimous vote of the building and grounds committee of the University of California Regents yesterday afternoon in a meeting at the social hall of the First Congregational church.

It is expected that the approval of the board of regents will be granted this afternoon in a meeting at the San Francisco UC Medical Center.

The committee also authorized sites for the initial buildings on the campus—Cowell college (the first residential college) on a knoll, overlooking the city and the bay—and the first unit of the science complex, part of the central core of the campus, located to the northwest of Cowell college (and the principal Cowell quarry), but only six minutes walking distance from the Cowell site.

In making their recommendation, members of the committee cautioned that state-funded capital and operating costs shall not exceed the comparable costs per student on other campuses.

Chairman Gerald Hagar of the board of regents also urged the architects to make every effort to preserve the beauty and the land of what he termed, "the university's most exciting new campus."

Mrs. Dorothy Chandler presided at the committee hearing as chairman of the committee on buildings and grounds.

The preliminary master plan was presented to the regents by Master Planning Architect John Carl Warnecke and Landscape Architect Thomas Church. Consulting architects are Robert Anshen, Stephen Allen, Theodore Benardi and Ernest J. Kump.

In carrying out the theme of the university's first residential campus, the architects have proposed a central core, housing such academic facilities as the library, the science complex, humanities

to cover the period from today to 1990.

It is expected that work on preliminary roads and utilities will start in fiscal 1963-64 with hopes that initial bids for construction can be sought late this year.

The campus is about 2½ miles long and more than a mile wide. By 1990 it is expected to handle 27,500 students.

Delegates Jeer China's Attack On Khrushchev

Berlin (AP). — Jeering, shouting Communists halted a speech by Red Chinese delegate Wu Hsiuchuan at the East German party congress today after Wu made a veiled attack on Soviet Premier Khrushchev's coexistence policies. Wu was shouted down after 30 minutes.

Khrushchev was not present to hear Wu assail "revisionists of the Tito clique"—the Chinese Communist way of criticizing Soviet leadership.

Snubbing the Red Chinese, Khrushchev spent the morning at an East Berlin television factory.

Throughout Wu's speech the 2500 delegates and guests from 70 Communist parties stamped their

two general sites for the construction of initial buildings on the Santa Cruz campus at a meeting here yesterday afternoon. The Cowell college site lies on a seven-acre knoll at the edge of the woods on the center eastern section of the 2000-acre campus. The quarry is visible to the left of the picture while the science complex, part of the central core is to the northwest of the residential college, about a six-minute walk away.

Wharf Fishing Area Dedication Tomorrow

Formal presentation to the city of the new end-of-the-wharf fishing facilities will be made tomorrow at 3 p.m. by the State Wildlife Conservation board.

The unique \$49,500 project, completed by the city with state funds, is a pilot project to test feasibility of such family-type recreation facilities.

It will be presented to Mayor Bert Snyder.

Other city, state and federal officials and the Santa Cruz High school band will participate in the ceremonies.

About 1180 lineal feet of fishing space is provided. The wharf perimeter is for the veteran fisherman. Eleven "wells" are included on the inside for the use of drop-line enthusiasts, young and old.

Emphasis is on safety and fun for the whole family.

Yet to come are benches and wind screens. Also planned is a building housing a snack bar, bait shop and public restrooms.

Featured speaker of the dedication ceremony will be A. Heaton Underhill, U.S. Department of Interior official and former long-time chief of New Jersey fish and game department.

Underhill is here for the Associated Sportsmen of California "little convention" this weekend. (See sports page.)

Sam McNeely, newly elected president of the Greater Santa Cruz Chamber of Commerce, will serve as master of ceremonies. He has promised a fast-moving schedule.

Among the notables appearing will be State Sen. Donald Grunsky, Assemblyman Alan Pattee and Ray Nesbitt—coordinator of Wildlife Conservation board, who will make the presentation to the mayor.

Also expected are W. T. Shannon, director of the state fish and game department and Sen. Aaron Quick (Imperial), a member of the Wildlife Conservation board.

GAITSKELL IMPROVED

London (AP). — Some improvement in the condition of British Labor party leader Hugh Gaitskell was reported today after treatment with an artificial kidney.

Annexation Drive Urged By Koester

Santa Cruz must embark on a strong campaign to encourage annexation, a joint fact-finding meeting of the city council and the planning commission was told last night by City Manager Dave Koester.

He stressed that while there were advantages and disadvantages to an extension of city boundaries, there is no choice but to expand. He pointed to Sacramento and Los Angeles as cities which had postponed aggressive annexation programs to their own later detriment.

Koester pointed out that while some areas adjacent to the city fall short of "desirable" city standards, they stand a better chance for development under city control.

Mayor Bert Snyder emphasized that a thorough experience with annexation was one of Koester's qualifications that strongly influenced his selection. Roseville

more than doubled in size during his administration there.

"We have been talking about this for a long time. Now we are going to start an annexation program rolling," he concluded.

Gay Noblitt, chairman of Santa Cruz of Tomorrow sub-committee which urged a strong city annexation program, expressed his satisfaction at what had been said.

Fire Chief Jack Sinnott indicated the "two-mile" rule of underwriters as a consideration in future annexation. This is the maximum distance land can be located from a fire station without extreme penalties in the form of high fire insurance rates.

Police Chief Geno Pini said his department would be able to

handle annexation easily. He did not visualize the need for any large-scale capital expansion.

Public Works Director Bill Fieberling pulled no punches in stating that sewers, storm drains, roads, and other improvements will cost "big money." He urged encouragement of local assessment districts as a means of financing the costs.

Water Director Weston Webber recommended that the water system be increased on the basis of predicted, increased population growth of the area.

In the past, he has concurred with the council-expressed position that water service be used "to encourage" annexation.

ation will depend on the outcome.

The \$200,000 bond issue, tentatively set for vote February 26, is to finance conversion of the Capitola treatment plant to a pumping station and provide trunk lines to carry influent to the East Cliff plant for processing. The bond also would pay the Capitola share of \$138,000 for a new East Cliff plant.

Capitola Sanitation district board of directors, headed by Supervisor Lewis Nelson will meet Tuesday at 7:30 p.m. in city hall to discuss the bond issue. If the bond issue fails, the sanitation district will lose a \$101,000 federal grant.

The present, both Capitola and East Cliff plants are under cease and desist orders by the State Water Pollution Control board be-

'Satisfactory'

Kansas City, Mo. (AP). — Former President Harry S. Truman underwent surgery for a hernia today.

A spokesman for Research Hospital described the surgery as "a routine operation for hernia repair."

The rupture was reported on the right side of the abdomen. Truman, 78, went into surgery shortly before 8 a.m. and was taken to the recovery room at 9:55 a.m.

The hospital said there were no complications in connection with the operation and that the former president was in a satisfactory condition.

Truman was expected to remain in the recovery room until 3 p.m.

Regents, Architects Visit Santa Cruz Campus

Regents of the University of California pose on the proposed library site of the Santa Cruz campus as Architect John Carl Warnecke points out plans for the long range campus development. The regents (standing

l. to r.) are: William E. Forbes, Robert Alshuler, Edwin W. Pauley, Philip S. Boyd, Chairman Gerald Hagar, Chancellor Dean McHenry, Mrs. Dorothy B. Chandler, John Canaday, President Clark Kerr, Theo-

dore R. Meyer, Donald H. McLaughlin, Norris Nashm, Mrs. Edward H. Heller, Edward Carter, Mrs. Randolph A. Hearst, William M. Roth and John S. Watson. Kneeling are architects, Ernest Kump, Robert

Anshen, Warnecke (with pointer), Thomas Church, Theodore Benardi and Stephen Allen. Behind the regents are the spreading limb of a huge bay tree which will be retained as an integral part of the library site.

Post Office Wants More

By Sy Berg

A surprise post office request for more San Lorenzo Park project land was presented to the redevelopment agency this morning.

A prompt "no" was given by the agency, backed by a stated willingness to go to court to protect the delicate web of projects they have contracted with the Keith Shaffer Park Plaza group and the Title Insurance and Trust company.

Both developers threatened to pull out of the project unless given prompt and unalterable assurances.

Fay F. Moran, chief of the land acquisition section, General Services administration, would only reply that he was acting in the direction of the post office.

"This is the first go-round," he said. He doesn't expect any firm plans or assurances from the post office for at least six months.

A parcel with a 165 feet of frontage on Water street was set aside for post office expansion at start of the project.

The post office has changed its mind several times in the intervening years. Today they asked for an additional 6000 square feet.

The agency members heard a fervent appeal from Shaffer.

"We've already scrapped one set of plans (at a figure well in excess of \$10,000) and we just can't go on wasting our money like that," he stated.

"Your agency uses federal funds, the redevelopment agency uses public funds, but we have only private capital," he told Moran.

"And we're about ready to throw in the sponge on this," he concluded.

red, situated and whisked to show their disapproval. This performance clearly underlined the control Khrushchev has exerted over the European Communist parties in support of his line that communism must be spread by means short of all-out war. It is Khrushchev's caution in a world commanded by nuclear weapons which has brought down scorn on his head from the Chinese Reds, who maintain that in Cuba he bowed to an American paper tiger.

Eagles Auxiliary Meeting Here Over Weekend

Approximately 300 members of the Eagles auxiliary from northern and central California will be in Santa Cruz this weekend to attend a mid-winter conference in Veterans Memorial building.

Among special guests will be Mrs. George Boyd of Walnut Creek, state auxiliary president, and her officers; Dorothy Wilding of Salt Lake City, grand madam chaplain, and Robert McLennan of Belmont, Eagles western regional president.

Members of Santa Cruz auxiliary will be hostesses for the conclave. Mrs. Bert Lacazette, auxiliary president, is general chairman. She will be assisted by Mrs. Vern Fulton and Mrs. Art Tucker.

Registration will be from 9 to 11:30 a.m. tomorrow, with conference sessions getting under way at 12:30 p.m. Clarence Waidelich, president of Santa Cruz Eagles, and Ida Niswender of the Santa Cruz auxiliary, will give the addresses of welcome.

Main business of the afternoon will be initiation and report of various chairmen and directors. A panel of auxiliary presidents will conduct a question and answer period.

Sunday activities will include a secretaries' panel in the morning and reports of state chairmen during the afternoon.

Championship drill teams from Haggin Oaks auxiliary, Sacramento, and Mountain View auxiliary will assist in ritual work during the two-day conference.

\$200,000 FIRE DAMAGE TO BELLFLOWER SCHOOL
Bellflower (AP). — Fire which started in a chemistry laboratory caused an estimated \$220,000 damages early today at Bellflower High school, firemen reported.
