Destruction For Construction

1-16-67

Destruction leading to construction of a two-story addition to the Santa Cruz city hall began today, as workmen for Granite Construction tore into four homes and other structures standing on the addition site. The

demolition and clearing work is expected to take about a week. The addition, which will cost a total of about \$600,000, including all construction and land acquisition costs and fees, is expected to be completed in about 10 months.
