

West Cliff Erosion Arrester

A towering crane daintily arches a five-ton boulder out over this cove at the foot of Columbia street as Granite Construction company begins work on the \$177,000 West Cliff erosion control program. The

large rock, quarried at the Pacific Coast Aggregates property near Davenport, is being set along a base line. Smaller core material will be filled behind and then another layer of fac-

◇ ◇ ◇

ing boulders laid until the materials stand 14 feet above average sea level. The project is jointly financed by the city, the state and federal governments. Fourteen West Cliff areas will be treated.
