

Historic Bridge Needs Repairing

Felton Fire Chief Ted Toft, right, points to the sidewall of the historic covered bridge that needs to be repaired. Looking on are Supervisor Vincent Locatelli, center, and Elmer Swan, temporary chief of the road department, who discussed a long range plan with the fire chief

◇ ◇ ◇

for repairing the structure. This is one of the chief projects of the Felton Fire department which has collected \$750 for the work. In checking the structure yesterday, Swan said he will draw up plans showing what needs to be done and the estimated cost. Toft reported work will begin on the county-

owned bridge as soon as plans are finished. When the bridge was damaged in the 1955 flood, the county spent \$2000 for lumber and Granite Construction company did the repair work. The bridge is located in Felton Grove and crosses the San Lorenzo river.
