

## Vault Is Cooled For Priceless Documents

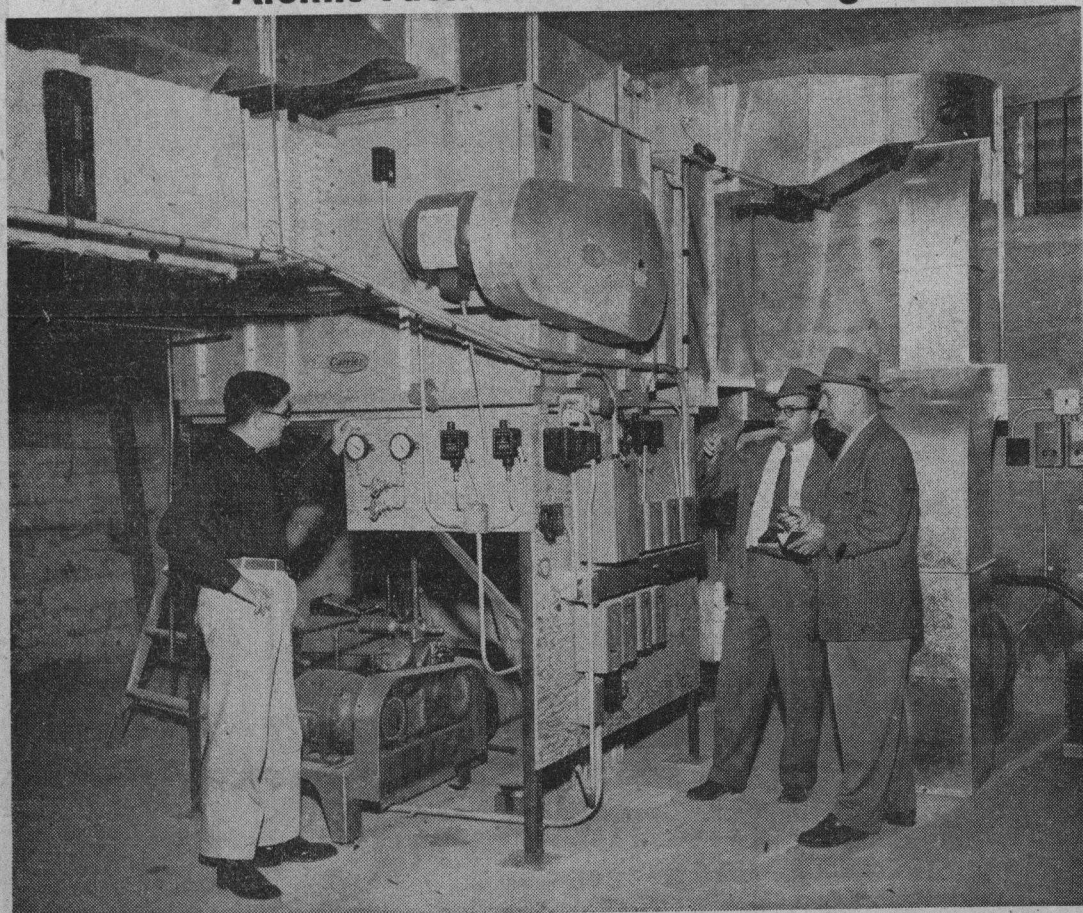

In order to keep the underground depths of the Western States Atomic Vaults, Inc., at a temperature suitable for the storage of microfilmed documents,

a strict check must be maintained on the relative temperature and humidity of the vault. F. E. Church, left, vault engineer for the Western States

Atomic Vaults, Inc., and J. M. DeLisle, maintenance man, are shown checking Honeywell graphs which record the relative temperature and humidity.

## Atomic Vault Has Air Conditioning

Inspecting the big air conditioning system which has been installed in the Western States Atomic Vaults, Inc., underground

bomb proof storage at Zayante are Lewis Brook, Carrier corporation sales engineer, left; Ben Sgroi, Carrier corporation construction engineer, and Joseph A. Harville, vice-president of the corporation which owns the vault.

struction engineer, and Joseph A. Harville, vice-president of the corporation which owns the vault.
