

'Solid Rock' To Be In Church

A native stone, approximately six tons in weight, has been moved from the Cowell property to a place of honor it will occupy in the new Congrega-

tional church which is being built on High street. The massive rock was moved by Santa Cruz Aggregates power equipment. Pictured around the stone

are Walter DuBois, president of Santa Cruz Aggregates, left; Clarence King, owner-manager of the King Construction company; Douglas Miller, chairman

of the church's building committee; and Rev. J. Bernard Corneliussen, the church pastor. The tractor driver is William Underwood.
