Jan. 3-5 Storm Damage Was Widespread

This map of areas damaged in the Jan. 3-5 storm graphically illustrates that the destruction was widespread and affected every populated area of

the county. The map recently was released by the county administrative office to show areas where damaged has been repaired with county funds

(squares,) areas that will be repaired with \$1 million the county has received in federal aid (triangles) and areas where public roads and

drainage facilities will be repaired if Measure A, the \$5 million disaster tax measure, is passed June 8 (circles.)
