ed slice of the world.

Cabrillo College **Cabrillo Class Size Is Above State Average**

"Cabrillo college is well above the state average on class size for junior colleges," Floyd Younger, director of instruction, reported yesterday.

"The strong enrollment has enable us to offer 107 classes in our diversified program," he said.

He said that most new junior colleges are faced with the problem of not having enough students during their first years of existence. Cabrillo anticipated about 350 full and part-time students and received almost 800.

Social science classes lead the roll of those with the largest class size. Following in turn are electronics, physical education, business education, humanities and science.
