# Twin Lakes Church Plan

Architect's aerial view shows the master plan for Twin Lakes Baptist Church's new 15-acre site off Highway 1, just west of Cabrillo College. The complex will include a large auditorium with seating for 2000, educational buildings with 1600-person capacity, parking lots for 500 cars. Master plan, approved by the church this week, was designed by Ifland Engineers, Inc. of Santa Cruz. First phase, to cost approximately one million dollars, will start construction in the spring of 1971.
