

DEDICATION  
of the  
City of Santa Cruz City Hall Annex  
Saturday, January 20, 1968

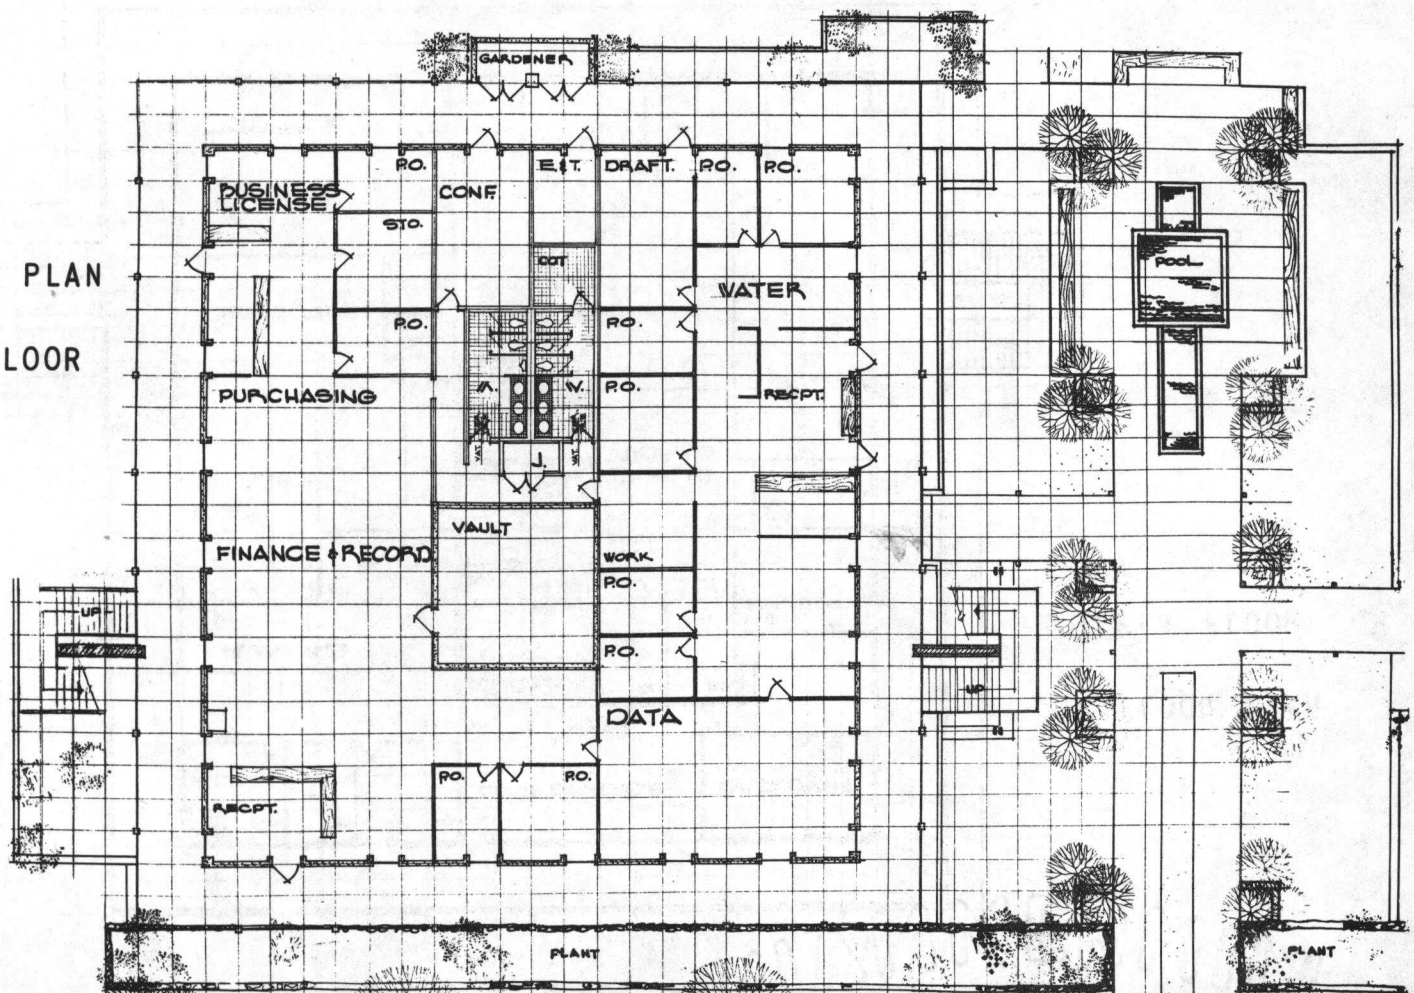

## MESSAGE TO SANTA CRUZ RESIDENTS:

Construction of your City Hall Annex has been phased over a period of more than one year to fit within the funds available to finance such a project. The new building became possible when you gave your approval for the sale of \$300,000 in bonds in 1966. Your City Council was able to put this together with \$200,000 carried over from prior years and have built this \$500,000 structure to more adequately meet the needs of city affairs today.

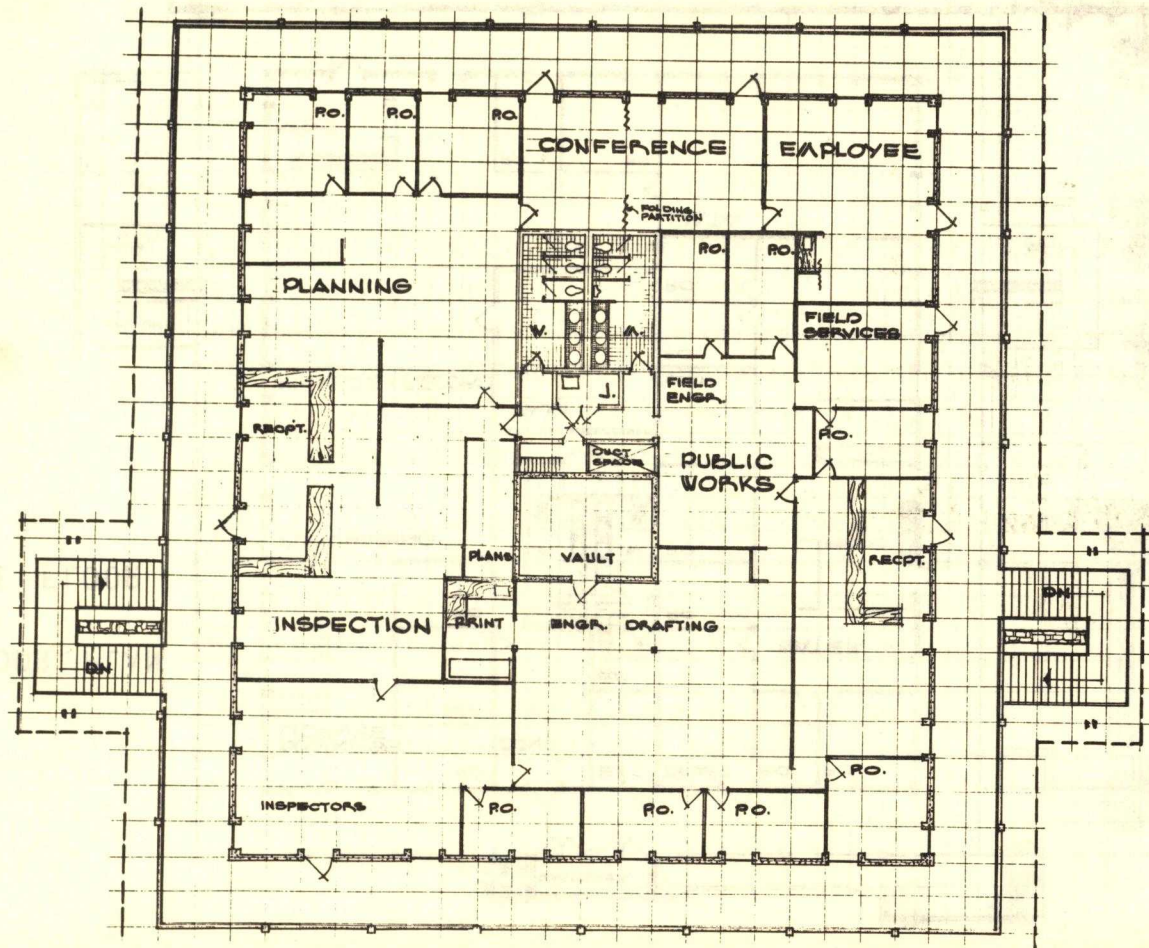

Your City Council has also been able to set aside an additional \$150,000 from unexpended funds to complete the remodeling of the existing City Hall this year. The total investment of \$650,000 will have been made with less than one half the financing borrowed, and with no increase in taxes.

The total expenditure represents a meaningful marriage with tradition, blended into a functional, adequate, but not extravagant structure.
