U CSC'S RESEARCH AND DEVELOPMENT
PARK AND SOME PRINCIPLES. UCSC
Chancellor Robert Sinsheimer has been stating all along that there would be no weapons or military-related research and development if and when his Amityhill on the Hill Park happens. The UC Board of Regents revealed to him and a group of concerned Santa Cruzans who testified at the Regents informational meeting last week that there was no way such non-weapons research controls would be imposed on the industries located there. Many people who have never doubted Sinsheimer's principles and ethics are now waiting to see if he will withdraw the R&D park plan (which he has the power to do) or whether he too will go belly up to the big money lure of the high tech crowd.
