

Beach erosion Shoring up

4-12-91

SANTA CRUZ — In the never-ending, but futile battle to hold back the tide, workers are building giant rock sea walls along West Cliff Drive at six loca-

tions between Columbia Street and Chico Avenue, including the Stockton Avenue cove. The \$2.5 million, two-week project is being financed by state funds

and is designed to stem the erosion of the West Cliff Drive bicycle path. Vehicle traffic is being detoured around the construction sites.
