From its vantage point, Whalers Cove stands as a great historian. Watching the sea as it does, this land has had imprinted upon it centuries of passing ships and sailing men. Past its bluffs came Sir Francis Drake in 1579. Later came the heavily laden merchant ships supplying young California with the treasure her gold bought. And the whalers came too. South from Massachusetts, around the Horn and north again, these rugged men sought the precious oil the great whales provided.
