

Twin Lakes Baptist Church Prepares Garden Chapel

Shown above is the new "Garden Chapel" of the Twin Lakes Baptist church which is rapidly nearing completion. The rock wall at left has planters at its

base and is illuminated by a bank of floodlights from above. An outdoor motif prevails throughout the chapel with the use of a flagstone floor and the

translucent panels in the ceiling. The chapel, 36 by 125 feet, parallels the main sanctuary at the right; and will serve as a foyer and as a chapel for wed-

dings. Because of its location, it can also be used to seat overflow crowds at regular services. Open house and dedicatory services are planned for the week of November 15.
